

NSP-33

The Wealth Building Strategy™

**The ONLY Trading System that
Generates Profits in ANY Market.**

GUARANTEED!

For the Trader Serious about Building Wealth

The Path to Trading Success Starts Here

“Good markets or bad, NSP-33 delivers profits year after year and that includes periods of extreme volatility like we are experiencing now.”

-Bob McFarland

The key to building wealth is to make consistent gains regardless of what the market is doing. You need an investment Strategy that can make money in bear markets, bull markets, sideways and even volatile markets.

We are Nirvana Systems and we've been building advanced trading technology for the past 20 years. Beginning in the 4th quarter of 2007, our Trading Lab Team turned their focus toward developing new techniques that would enable a Strategy to make profits – even in the current period of increased market volatility.

The result is a fully automated trading Strategy that incorporates our knowledge of previous market behavior and these new techniques capable of handling extreme volatility. The Strategy is named NSP-33 and its performance is nothing short of remarkable.

NSP-33 not only outperformed the market in the bullish periods we saw in 2003 - 2006, it also consistently made money in the bear market of 2000 - 2002 and the volatile period starting in mid-2007.

The charts on pages 6-7 tell the story. If you had used NSP-33 for the past eleven years, you could have seen your account grow substantially.

If you are serious about building wealth, you owe it to yourself to learn about NSP-33.

Nirvana Systems Inc. Headquarters in Austin, Texas.

“I have been a profitable, full time trader for four years now. A large part of this success I owe to Nirvana Systems.”

- Bill Graves

What is NSP-33?

NSP-33 is a proprietary automated trading Strategy released by Nirvana Trading Labs. It is the marriage of separate Long and Short techniques designed to incorporate and take advantage of recent market volatility. This enables NSP-33 to make money consistently in a variety of market conditions.

In Bull Markets, the Short side of the Strategy fires less, allowing the Long side of the Strategy to make big gains, far surpassing the performance of the market (see table, page 6). In Bear Markets, the number of Short Trades increases, which cushions the Long Trades while making large profits on the way down.

In Volatile Markets like the one we have seen recently, NSP-33 automatically adjusts to trade both sides to take advantage of swings in the market.

With NSP-33, it truly is possible to consistently build wealth – no matter what the market does.

Identifying the Best Candidates

The first step in our process is to scan the major indexes (Russell 3000, S&P 500, etc.) to pinpoint those stocks that work well with mechanical Trading Strategies.

NSP-33 then looks for specific setups for both Longs and Shorts independently. This is very important, because the ideal setups for Long Trades are different from the ideal setups for Short Trades.

The Long Side

Our goal for NSP-33 is to capture strong moves for consistent profits. The NSP-33 Long Strategy (NSP-33-L) uses a sophisticated process that identifies bullish setups within the primary trend. It then applies money management techniques that manage the trade to an optimal exit (see chart, on page 5).

In an up-trending market, NSP-33-L generates returns far in excess of the market itself. But we all know the market doesn't always go up, which is where the Short side of NSP-33 comes into play.

“Absolutely amazing! NSP-33 is a cash machine ringing up consistent profits in bullish and bearish markets!” – Daniel Wilson

The Short Side

The NSP-33 Short Strategy (NSP-33-S) takes a completely different approach to finding profitable trades. A proprietary filtering process is used to find stocks that are showing signs of weakness. Once the proper setup has been identified, NSP-33-S fires trades early in decisive moves, often capturing double-digit gains as shown in the example on the right.

NSP-33-S has virtually shown profits in ten of the last eleven years, including the very bullish period of 2003-2006. But the real power of this Strategy is realized during corrections and bear markets. During a market correction, NSP-33-S offsets losses in long trades by profiting from the stocks that are leading the correction. In protracted bear markets, these short trades can make very large gains, allowing you to make substantial profits while the market is in a decline.

The proof is in the equity curve on pages 6-7. NSP-33 has not only beaten the market on a consistent basis, it has also shown steady profits regardless of what the market is doing.

It's Automatic

NSP-33 runs in OmniTrader, which is included with the Strategy. The Signals and Exits are completely automated. All you do is review the trades and place them with your broker, taking all of the guesswork out of trading the Strategy successfully.

An NSP-33 Long Trade. Notice the ideal entry point and stops following the trade to an optimal exit.

An NSP-33 Short Trade. As the stock rolls over, NSP-33-S picks up the weakness and Shorts the stock. In this case, a 41% return was made on the position in just 8 days.

Works in All Markets

Thanks to the market filters and money management approach in NSP-33, the Strategy has proven itself to be profitable in virtually all markets. The equity curve on this page was generated by taking every trade generated by NSP-33 from 1998-2009 on the stocks in the Russell 1000 index, with 10% of equity allocated to each trade. NSP-33 made money and beat the market ten out of eleven years, including years when the market declined.

Works Across Time . . .

	S&P 500	NSP-33
1998	+26%	+31%
1999	+20%	+55%
2000	-10%	+20%
2001	-13%	-4%
2002	-24%	+21%
2003	+26%	+31%
2004	+9%	+9%
2005	+3%	+12%
2006	+14%	+7%
2007	+4%	+40%
2008	-39%	+5%
2009	+3%	+12% (thru June)

In our simulated trading tests, NSP-33 beat the market every year since 1998 with the exception of 2001. It averaged an annual return of 20% with manageable draw downs for the past 11 years. For a description of how the Equity Curves were generated, go to www.nsp33.com.

"I am thrilled to see the long term performance of NSP-33. It is fantastic that we have a robust Strategy which has tested well in all market conditions."
 - Tony Birchfield

NSP-33 includes a Success Support System designed to help you succeed.

The NSP-33 Success Network

Get plugged into the exclusive community of NSP-33 users on our proprietary NSP-33 Success Network web site!

Each day, we post all of the Signals generated by NSP-33 and provide the current exit levels for every open trade. This allows you to easily trade the Strategy without having to run it on your computer every day. If you decide to run the Strategy in OmniTrader, you can use the web site to verify that your Signals match the official Signals posted to the site.

In addition, NSP-33 owners are able to discuss each trade generated by the Strategy. You can share information, compare trading techniques and learn from other traders. Only NSP-33 owners have access to the site, creating an elite community of successful traders.

The NSP-33 Success Network will provide the confidence and support you need to consistently win in the markets for years to come.

“Nirvana has presented us with an excellent stock trading Strategy that can really provide income during my retirement.” -Bud Wilkes

Included with NSP-33

Getting Started with NSP-33

The NSP-33 manual will give you all the information you need to know to be up and running within minutes of receiving the package.

Building Wealth with NSP-33 Seminar

This seminar was created to fully inform our NSP-33 users about the research and theory behind this powerful Strategy. The seminar demonstrates how to apply NSP-33 in the market each day and gain maximum benefit from the NSP-33 Success Network.

OmniTrader 2009

The latest version of OmniTrader enables you to generate today's NSP-33 Signals with the push of a button. Place trades directly in the charts and use the integrated Portfolio Module to track progress and adjust your stops. You can run NSP-33 on your own lists and even use the base Strategy to develop new ideas.

Priority Technical Support

As an NSP-33 owner, you receive priority technical support under the direction of our Director of Customer Service, Jonathan Grasty. If you encounter any difficulty with the software, web site or materials, just call our priority 800 number and you will receive all the help you need.

Guaranteed for ONE FULL YEAR—or Your Money Back!

NSP-33 Pricing and Terms

Our One-Year Money Back Guarantee

Get NSP-33 and use it for 90 days. If you are not happy with NSP-33 for ANY reason within this trial period, just return it for a 100% refund.

After 90 days you can still receive a refund for up to one full year from purchase. Just execute at least 10 trades from the official NSP-33 Signals as posted on the NSP-33 web site. If they don't perform according to the terms of the One-Year Performance Guarantee*, we will refund your purchase price.

End User License and Non-Disclosure Agreement

We want to ensure that those customers who trade with NSP-33 are successful. That's why we are limiting the number of copies sold outside the Nirvana Club to just 300. We must ensure that all NSP-33 Signals are not shared outside the NSP-33 owner base in any way. An End User License and Non-Disclosure Agreement must be signed with each copy sold.*

*See the NSP-33 End User License and Non-Disclosure Agreement and Performance Guarantee for complete details.

NSP-33 End User License \$3,000

Out of a total of 300 copies, there are only 150 copies of this system left. You can purchase your copy for \$3,000. This is still much less than people pay for other Trading Systems that only work in a limited number of market conditions. And NOBODY offers a One-Year Guarantee.

Acquiring NSP-33 and the NSP-33 Success Support System is easy. Just fill out the enclosed End User Agreement and fax or mail it to us. After approval, we will rush your NSP-33 package to you via overnight delivery.

But don't wait – submit your application today! Because once we've sold the 300th copy, the opportunity to build wealth with NSP-33 will have passed.¹

NSP-33 is the result of millions of dollars of development costs. Nothing in the market comes close to the robustness and performance of this Trading System. Join the elite group of traders who are building wealth in any market condition. You'll be glad you did.

¹ Applications will be accepted on a first-come, first-serve basis, according to postmark or dated fax transmission.
