The Opportunity of a Lifetime

Ed Downs
CEO and Founder,
Nirvana Systems, Inc.

The U.S. Stock Market has just seen one of its largest corrections in history. It may be the perfect time to buy. Who knows? But one thing is certain—this IS the perfect time to TRADE. With stocks moving 50% to 100% in a few days, this is a trader's market.

We all know we should be trading this market. The only question is how? Which methods should we use? Which stocks should we be analyzing? The OmniTrader 2009 upgrade is specifically designed to answer these important questions, beginning with a new interactive tool called OmniNet.

The philosophy of helping others succeed is deeply rooted in all levels of our organization and customer base. I have found that our most successful traders truly enjoy sharing how they are making money with other users. And for the first time, you will be able to gain insight from our most skilled market warriors as they do battle with Wall Street.

One thing is certain—this is the perfect time to TRADE.

Our Nirvana team is also applying OmniTrader 2009 in the current market and will now be posting valuable insights into OmniNet each day. We provide lessons in Technical Analysis, Market Commentary, and tips on how to maximize your trading with OmniTrader—all delivered on a robust, interactive platform that facilitates asking questions and getting answers live.

OmniTrader 2009 includes multi-monitor support, enabling you to see more candidates AND more columns in your Focus List at the same time. You can add indicators to your

list making it easy to sort by indicator values to find the strongest and weakest stocks. Perhaps the most timely and innovative product in the upgrade package is the new Seasonality Module. We seriously considered holding it back to sell as a stand-alone program, but as market events have unfolded, we realized it was the perfect time to introduce it.

You may be wondering, "If the entire market is down, won't those stocks with seasonal buy modes decline as well?" Sure. But, when the market starts to rally, it is those stocks with seasonal accumulation modes that will be the biggest and fastest movers—and those are the stocks you will want to be watching!

Last but certainly not least, our new *Profiting with Market Breadth* seminar will show you how to use the new Market Breadth indicators to align your trades with overall market direction and ascertain directional strength.

So, there you have it. A market with unprecedented historical volatility. And an OmniTrader that is custom tailored to take advantage of it. A year from now, we'll all be saying, "Wow. That truly was the opportunity of a lifetime." Now is the time to take advantage of it—with OmniTrader 2009.

Sincerely,

Ed Downs
CEO and Founder,
Nirvana Systems, Inc.

OmniTrader 2009

Just in Time

to help you trade THIS market!

I sincerely hope you are running your OmniTrader every day in this market. We're seeing opportunities that are unlike ANY we have seen in the past 50 years. It's a trader's market!

However, we also recognize that this market is unlike anything we have ever seen before. So the question is, what are the best tools and methods to take advantage of it? Introducing OmniTrader 2009—just in time to help you trade this market.

Introducing OmniNet

In the current environment, we realize how important it is for us to help our customers make money with our products. That's why we added OmniNet to the OmniTrader 2009 upgrade.

OmniNet allows us to join forces with our most successful customers to provide relevant information to our users every day. As events unfold and the market sets up its structure, we share our knowledge and that of our most experienced traders.

OmniNet is integrated directly into OmniTrader 2009, making it easy to capture and share charts with other users or Nirvana staff. Two clicks is all it takes. Rather than talk about the moves after the fact, we are discussing today's setups for tomorrow's trades.

Seasonality for Stocks

Increased market volatility makes it important to check any seasonal biases that may exist before placing a trade. By identifying those stocks that are poised to go up or down based on seasonal tendencies, you increase your odds for

OmniNet provides OmniTrader users with an unprecedented edge by putting you in contact with successful traders.

making money. OmniTrader charts now display the seasonal tendencies in the new Seasonality Module. Read about this incredible new module on page 6.

Market Breadth

Market participation is another important factor to consider before entering new positions in a market like this. The indexes may turn up, but that doesn't necessarily mean the market is getting bullish.

It is important to gauge how much energy is behind the move. To provide this, we are including over 40 Market Breadth indicators in OmniTrader 2009, and offering a special seminar on how to use them to be successful in this market.

Additional Features

OmniTrader has multi-monitor support, which means you can see more charts and information in the Focus List. Capturing and sharing charts is a snap with the new screen capture tool. You can now download all of your Nirvana products including plug-ins and modules in one simple operation with **Get My Plug-ins**. All license keys can also be automatically entered for you with the new CD key feature.

Just in Time for This Market

Don't miss the opportunity of a lifetime. Seize the day with OmniTrader 2009!

INTRODUCING OmniNet

OmniTrader first shipped in November 1994. Since then, our development team has continued to enhance the program to provide new features that improve usability and profitability of the signals, and OmniTrader 2009 is no exception (see page 9).

Delivering state-of-the-art software is important but teaching our customers how to be successful using the software is our ultimate goal. And that is where we focused a lot of energy for the OmniTrader 2009 upgrade.

Introducing OmniNet

OmniNet is our communication platform inside OmniTrader 2009, allowing users to interact directly with each other and our Nirvana staff in real time.

OmniNet works like other chat applications. There are educational, private, and trading rooms. There is also a schedule, so users know when sessions will be held in any room.

OmniNet is integrated into OmniTrader 2009. A button provides screen capture support. Share charts in just two mouse clicks and instantly broadcast to a group of users in a given trading room.

Voice support is also being added so you don't have to read or type—you can just listen and talk. If a question pops into your mind, simply ask it!

User Profiles

We maintain a profile for each user with space to enter trading interests, time frames (Real Time, etc.), trading vehicles (Stocks, etc.) and other special interests. Simply click a button to see a person's

The screenshot displays the OmniNet interface. On the left, a 'Rooms' list includes 'Using Indicators', 'Company News', 'Market Wrap', 'Daniel's Room', 'CPRM3', 'Group Trader', 'eMini Traders', 'ITLB Plug-In', 'Opening Bell', 'News Stocks', and 'Market Direction'. Below this is a list of users in 'Daniel's Room', with 'Scott M.' highlighted. A yellow arrow points from Scott M.'s name to a detailed user profile window. The profile for Scott M. includes a photo, a quote: "I am looking for others to share eMini trading concepts and opportunities with during the day session.", and lists his programs (VisualTrader, OmniTrader Professional, CPRM3, GroupTrader, ITL8, WaveTrader), data feed (eSignal RT), broker (Interactive Brokers), trading interests (eMini Futures, End of Day, Real Time), and experience (5 years). A 'My Files' section shows 'eMini_1.obb' and 'eMini_2.obb' with a description: 'Strategy I have modified for the eMinis Same Strategy as eMini-1, but with tighter exits.' In the background, a chart for 'HAL - HALIBURTON CO (DAILY)' is visible, showing price movement and a 'Trading Range'.

OmniNet facilitates the sharing of charts and trading ideas, plus the ability to find users with similar interests.

profile. You can also search for other users with similar interests and invite them to a discussion or private room.

Secrets of Success

Our users constantly amaze us with the ways they are using our tools. For example, in a recent Real Time trading seminar here at Nirvana, we found that several users were doing well trading the eMinis with Nirvana's GMMA Plug-in. And, they showed us how they were doing it!

Imagine sharing information like this with traders who are using our products every day and making money with them. With numerous live discussions and recorded sessions, there is always a wealth of information to draw on.

OmniNet is your trading partner. Share ideas. Tune in to our trading team here at Nirvana. Now, you can get great trading ideas each and every day from our OmniTrader network!

Sessions are recorded.

Each day, we use OmniNet to hold discussions with our customers on the market and the use of our tools. Rooms are scheduled throughout the day so users can connect on various topics of interest.

Meet the OmniNet Team!

Educational and trading presentations will be consistently provided FREE by the top talent at Nirvana Systems.

Ed Downs, CEO and Founder

Jeff Drake

Steve Belknap

Frank Ochoa

Angela Duran

Jeremy Williams

Lydia Fiedler

Tune in for Education

Our Nirvana team delivers four kinds of FREE education and commentary for our OmniTrader users, designed to enhance your trading experience and help you make money with the software. Our educational sessions are recorded so users can watch them when they like.

OmniTrader Usage

Each week, our support staff holds live sessions that delve into the workings of OmniTrader to answer customers' questions like, "How do I edit my Trade Plan to add a Stop Limit Order?"

Fundamentals of Charting

Technical Analysis is a broad field. We are providing special sessions on Technical Analysis to educate our customers on indicators and other aspects of the art.

Market Commentary

Each day, we review the basic structure of the market and identify important levels of support and resistance. This can provide insight into what to watch for in the coming days and weeks.

Product Demonstrations

With OmniNet, we can demonstrate our various products live, so you can decide what will be helpful in your trading. AND, you can hear feedback from other customers who are actually using the products.

With OmniNet, every day is a new opportunity to learn and grow as a trader, with additional help from our Nirvana staff. **The best news is, OmniNet is included absolutely FREE with OmniTrader 2009.**

The Seasonality Module

Find Explosive Moves in Volatile Markets!

How Seasonality Effects Stocks

When we think of seasonality most of us think of Commodities. Agricultural products typically are higher in the Fall. Hence the saying, "Buy in the Summer, sell in the Fall." But did you know that many stocks also follow seasonal tendencies?

Take a look at the charts for Microsoft on the right. In five out of six years from 2002 through 2007, Microsoft declined January-March and rose in October-November. And so far, 2008 is following the same pattern.

How can we profit from this information? Clearly, it would be best to only trade short signals in the first quarter and long signals in the fourth. Or, at least, we should refrain from taking counter-seasonal trades in Microsoft.

Why do stocks behave this way? In the case of Microsoft, it is most likely due to the fact that companies buy new technology early in the 4th quarter for the coming year. But other companies are seasonal for other reasons.

One of the most interesting cases we discovered was Oracle (symbol ORCL) which has gone up in June nine out of the past ten years. Why? Their fiscal year ends May 31, so they book as many orders as they can by that date, leading to increased earnings.

By identifying those stocks that are poised to go up or down based on seasonal tendencies, you increase your odds for making money. You could in fact base an entire trading approach on this concept.

Microsoft 2002-2007

Microsoft has shown strong seasonal tendencies, with most years showing a decline in the 1st quarter and a rally in the 4th quarter.

Put the Power of Seasonality to Work Today

We have created a powerful new tool that plugs right into OmniTrader to take advantage of the seasonal tendencies. It's called the Seasonality Module and with this module installed, you can instantly see seasonal tendencies in any chart you bring up!

The Seasonal indicator is easy to use and intuitive to understand. Bring up the Seasonality window and instantly any chart you plot in OmniTrader will be analyzed for seasonal tendencies.

Bullish or bearish zones are clearly marked, with strong seasonal tendencies highlighted in a strong color. The module is totally configurable—you can test as many years as you like. And, the entire analysis can be performed on ten years of data in less than a second.

To the right is the analysis on Intel. Note the bright green and red zones. These are the strong seasonal tendencies. Click the Chart tab to see the seasonal (average) chart.

OmniTrader charts also display the seasonal tendencies in the new Seasonal indicator, which can show quarterly or monthly seasonality. Just activate this indicator, and at a glance you can tell if the stock you are about to trade has a *seasonal bias*. **This simple check could make or save you thousands of dollars.**

Seasonal Grid showing all months for all years being studied.

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Annual

Chart with Seasonality Indicator and Monthly Seasonality. Note how the indicator would have kept us out of the Short Trade in April while confirming the other trades – all of which made a profit. The confirmed Seasonal Trades are circled.

Seasonality Module

Awesome Prospecting Power

Using the power of the Focus List, you can add Seasonality to a column of the list and see which stocks with a buy signal ALSO have a bullish seasonal tendency.

Using the new indicator column feature in OmniTrader 2009, you can add specific columns for the Focus List that instantly tell you how well the stock is matching its seasonal trend.

Once added, the Seasonal indicators will be calculated each time you run the To Do List. It's then a simple matter to sort and find those stocks with the highest seasonal trends that ALSO have buy or sell signals.

The other way to use Seasonality is as a confirming tool. Just add the columns and check them before you buy or sell, to make sure you are not trading opposite the seasonal tendency.

A Powerhouse in This Market

You may be wondering if Seasonality is helpful in the increased volatility we have been seeing. Absolutely! When the entire market goes down, even stocks with strong seasonal tendencies will be dragged with it. BUT, when the market starts back up, it is those stocks with a seasonal, upward bias that are most likely to experience an explosive upside move. Needless to say, this tool could help you make a LOT of money in the coming months.

The Seasonality Module is a great addition to OmniTrader 2009. All it takes is one good trade—or avoiding one bad one—to pay for it!

Here we see the Seasonal Indicator in both the charts and in a column in the Focus List. We sorted the column to bring the highest seasonal percentage movers at the top. Both DELL and AAPL show high seasonal gain percentages. When the market begins to rally, these stocks and others with strong seasonal tendencies should be among the biggest winners.

The POWER of Seasonality NEW SEMINAR by Jeremy Williams

This seminar by Jeremy Williams goes through the ins and outs of seasonal theory, reviewing powerful trades identified through Seasonality and which setups have the most potential.

Armed with this knowledge and the new Seasonality Module, you will be ready to identify the highest probability trades.

The Power of Seasonality

Seasonality on Stocks

- Why it works
- How Calculations are Made
- Case Studies

Seasonality on Futures

- Buy in the Summer
- Sell in the Fall
- Durable commodities
- eMinis and other market contracts

Seasonality Module

- Building a Good List
- Adding Columns to the Focus List
- Confirming Your Trades with Seasonality

OmniTrader 2009

New Features to Make Life Easier

and Trading More Profitable!

NEW! Market Breadth Indicators*

Market Breadth indicators measure the performance of all of the stocks on the major exchanges in order to give you insight into the direction and strength of the overall market. OmniTrader 2009 includes over 40 Market Breadth indicators that you can use for visual or automated confirmation. Each indicator is computed for the complete market as well as for each major exchange.

- Volatility Indexes
- ARMS (TRIN) Index
- Put/Call Ratio
- Advance/Decline Line McClellan Oscillator
- McClellan Summation Index
- Bullish Percent Index
- New High/Lows Ratio (Last 4 Weeks)
- New High/Lows Ratio (Last 2 Weeks)
- Stocks Above 50 Period Moving Average
- Stocks Above 150 Period Moving Average
- Stocks Above 200 Period Moving Average

*Requires subscription to OmniData.

Multi-Monitor Support

Now you can add charts to other monitors. Put your Focus List on one, Chart books on another, indexes on another—arrange your multi-monitor layout any way you like!

Indicators in the Focus List!

You can populate the Focus List with any indicator that helps you confirm your trade, including the new Seasonality indicators. Or, add your own custom indicators developed for OmniTrader Professional. You can sort them and instantly find the best candidates that also have buy or sell signals.

Ease of Use Features

Capture and Share

Capture screens directly to OmniNet using the new, integrated Screen Capture tool, or save them on your computer. Bring up charts in OmniTrader that another user or the Nirvana team posts.

Organize Folders

OmniTrader 2009 organizes all of your strategies indicators, and systems not only alphabetically, but also by plug-in type. It is easier than ever to find what you need.

Get My Plug-Ins

With one button, download everything you have purchased from Nirvana—all plug-ins and modules, including Strategies and Indicators. All license keys can be also automatically entered for you with the new CD key feature!

Profiting with Market Breadth

SEMINAR

by Jeff Drake, Director of Education

To be successful in this market, it is imperative to be aligned with overall market direction and to ascertain directional strength. Getting this right empowers you to take advantage of the tremendous opportunities that this market is providing.

Most traders look solely at an index's chart, such as the S&P 500, in order to understand where the market is heading. But indexes only tell part of the story. In order to understand what the market is doing as a whole, many savvy traders turn to Market Breadth indicators.

Market Breadth indicators measure the performance of all of the stocks on the major exchanges. By providing insight on how many of the stocks are participating in the current moves, we gain a much better feel for overall market sentiment. And most importantly, we can tell whether a move is likely to continue or if it is poised to reverse.

In *Profiting with Market Breadth*, Jeff Drake shows you how to use these indicators to quantify the direction and strength of the overall market. This seminar covers all of the major Market Breadth indicators including the Advance/Decline Line, Put/Call Ratio, the ARMS Index, and several more. Jeff will not only explain how the indicator is calculated, but also show you how each one is used to help predict future market direction.

With the addition of over 40 Market Breadth indicators to OmniData, OmniTrader 2009 users have the ability to use these indicators for visual confirmation or they can use them in their OmniTrader trading strategies for automated confirmation. After watching this powerful seminar, you'll be amazed at how much this knowledge is going to immediately improve your trading results.

Profiting with Market Breadth

1. Introduction - Defining Market Breadth
2. How Market Breadth Analysis Helps Us
3. Advancing Stocks vs. Declining Stocks
The Basis For Market Breadth

• Get My Plug-ins

Install all of your Nirvana software in one simple operation. Download and register all of your products, including all plug-ins and modules.

More NEW Products Available:

Seasonality of Stocks Module

w/Power of Seasonality Seminar

Many stocks follow seasonal tendencies and this powerful module shows them to you instantly. OmniTrader's charts now display seasonal tendencies — see at a glance if the stock you are going to trade has a seasonal bias which could make or save you thousands of dollars.

Profiting with Market Breadth Seminar

To be successful in this market, it's important to be aligned with the overall market direction and to be aware of directional strength. This powerful new seminar by Jeff Drake will show you how to use Market Breadth to quantify the direction and strength of the overall market to immediately improve your trading results.
